To Whom It May Concern,

This is to register my firm objection to the proposal by the Office of Environmental Health Hazard Assessment to assign "No Significant Risk Level (NSRL)" for the chemical glyphosate to be adopted into regulation in Title 27, California Code of Regulations, section 25705. I am a scientist/land manager at 4,000 acre Audubon Starr Ranch in southeast Orange County, California where, due to negative effects of glyphosate on humans, wildlife and the environment we have controlled weeds since 2001 without chemicals (successfully).

Attached is a bibliography on negative herbicide effects, including those of glyphosate on humans, that I've kept current.

I urge you to withdraw consideration of the NSRL for glyphosate.

Thanks for the opportunity to comment.
